

**STATE WATER CONSERVATION COMMISSION**  
**Minutes of Meeting**  
**Held in Office of State Water Commission in**  
**Bismarck, North Dakota**  
**June 12, 1958**

A regular meeting of the North Dakota State Water Conservation Commission was called to order on June 12, 1958, in the State Water Conservation Commission Office in Bismarck, North Dakota, to consider routine business matters. The following were present:

**MEMBERS OF THE STATE WATER CONSERVATION COMMISSION**

Honorable John E. Davis, Governor and Ex-officio Chairman

Earle F. Tucker, Vice Chairman, Bismarck

A. M. Christensen, Member from Minot

W. W. Corwin, Member from Fargo

Einar Dahl, Member from Watford City

Math Dahl, Commissioner of Agriculture & Labor, Member from Bismarck

Milo W. Hoisveen, Secretary and Chief Engineer, State Engineer, Bismarck

The meeting was called to order at 9:45 a.m. by Vice Chairman Tucker with Commissioners A. M. Christensen, W. W. Corwin, Einar Dahl, Math Dahl and Secretary Milo W. Hoisveen present.

It was moved by Commissioner Christensen and seconded by Commissioner Math Dahl that the reading of the May, 1958, Minutes be dispensed with and that the same be approved. All members voted aye and said motion carried.

It was moved by Commissioner Math Dahl and seconded by Commissioner Einar Dahl that the Financial Statements for April and May, 1958, be approved and filed in the office of the State Water Conservation Commission. All members voted aye and said motion carried.

Secretary Hoisveen stated that he had received a Resolution and Petition from the Richland County Board of Commissioners, dated May 6, 1958, requesting the establishment of a water conservation and flood control district in said county. It was moved by Commissioner Math Dahl and seconded by Commissioner Corwin that Secretary Hoisveen be authorized to hold a hearing in Richland County to determine public sentiment relative thereto. All members voted aye and said motion carried. The meeting has been scheduled for Friday, June 13th, at 2:00 p.m.

Governor John E. Davis entered the meeting and assumed the chair.

Secretary Hoisveen stated that a request has been received from Richland County relative to drainage participation in Drain #2 near Abercrombie. The approximate cost of said work is \$25,000. Secretary Hoisveen stated that a great deal of erosion is occurring on said drain and that it is cutting back to such a degree that it will affect some of the bridges. One large box culvert has been undermined at present and will require extensive work. It was moved by Commissioner Corwin and seconded by Commissioner Einar Dahl that the State Water Conservation Commission participate in said drain to the extent of 40% of the cost thereof, or not to exceed \$10,000. Upon roll call all members voted aye and said motion was unanimously carried. Approval of said project is contingent upon inspection by staff members of the State Water Conservation Commission.

61

A request from Cass County relative to Drain #49 has also been received by Secretary Hoisveen. The approximate cost of said drainage work is \$10,000. It was moved by Commissioner Corwin and seconded by Commissioner Math Dahl that the State Water Conservation Commission participate with Cass County in said drain to the extent of 40% of the cost thereof, or not to exceed \$4,000. Upon roll call all members voted aye and said motion was unanimously carried. Approval of Drain #49 shall be contingent upon inspection by staff members of the State Water Conservation Commission.

Secretary Hoisveen stated that numerous groundwater surveys have been conducted throughout the State by the Commission. The pump which the U.S.G.S. obtained is being used to pump water at Cartwright but that the same has a limited capacity and, consequently, cannot obtain the desired results. It was brought out that the quality water test presently proceeding on the Cartwright pump is showing signs that the water is improving. While the tests are not conclusive, they are encouraging. He stated that inquiry has been made of the Western Land Roller Company of Hastings, Nebraska, relative to a pump with a greater capacity. They quoted a figure of \$686.65, FOB Hastings, Nebraska, for an 8 inch belt head pump. Commissioner Christensen moved that informal bids be let and that Secretary Hoisveen be authorized to purchase a pump from the successful bidder, as he shall determine. Said motion was seconded by Commissioner Math Dahl. Upon roll call all members voted aye and said motion carried.

Secretary Hoisveen stated that the Commission owned Studebaker Pickup is not giving satisfactory service and requested permission to replace the same. It was moved by Commissioner Math Dahl and seconded by Commissioner Tucker that Secretary Hoisveen be authorized to let bids for a 1 Ton truck and that a new truck be purchased at the discretion of Secretary Hoisveen. Upon roll call all members voted aye and said motion carried.

It was reported by Secretary Hoisveen that the Lower Heart Water Conservation and Flood Control District has requested additional assistance to that approved by the State Water Conservation Commission at their May 1958 meeting, to wit, \$50,000 to be pro-rated between the Board of Administration, the State Highway Department and the State Water Conservation Commission. Pursuant to said request, conferences have been held with the Board of Administration, the State Highway Department and the State Water Conservation Commission. The State Highway Department and the Board of Administration have agreed to contribute a total amount of \$20,000 each. It was moved by Commissioner Tucker and seconded by Commissioner Corwin that the State Water Conservation Commission appropriate \$40,000 for the City of Mandan's flood protective works, and that in making said payment, it be specifically understood that the State will not contribute any more funds to said project. Upon roll call all members voted aye and said motion carried. Secretary Hoisveen stated that he has received a letter from Mr. Richard P. Gallagher, Attorney for the District, stating that they will seek no further financial assistance. The Commissioners did not believe that this letter was adequate and directed Secretary Hoisveen to write to the Chairman of the District requesting the Board of Directors to pass a resolution stating that additional funds would not be requested from the State in conjunction with the Lower Heart flood protective works. The estimated cost of the project is \$2,400,000 and it is anticipated that construction will commence prior to July 1, 1958.

65

Consideration was given to areas for topographic mapping commencing with the 1960 biennium. Three quadrangle sheets in the Williston-Dickinson area have been authorized and are in the process of completion. It was stated by Secretary Hoisveen that it would require one more quadrangle to complete the desired block in each area. In view of the interest to attract industry to North Dakota, Secretary Hoisveen stated that he contacted Mr. Larry Schneider of the Economic Development Commission, and he suggested that quadrangles in the Valley City and Grafton areas would be highly desirable. It was moved by Commissioner Christensen and seconded by Commissioner Math Dahl that the topography of these areas be authorized. Upon roll call all members voted aye and said motion carried.

Secretary Hoisveen advised the Commission members that the Legislative Research Committee had recommended that the State Water Conservation Commission move their offices to Fort Lincoln in an endeavor to provide additional space for other departments. He itemized various reasons why he felt such a move would be most unwise, which are as follows: The State Water Conservation Commission carries on many activities with state agencies and the federal government, such as the U.S.G.S. and the Bureau of Reclamation. There are times when over 100 water right hearings have been held in one year. Frequently ten to fifteen people attend these hearings. Many people come to the office requesting maps and field notes throughout the state. Many groups visit the office on business, such as County Commissioners, board members of water conservation and flood control districts, park boards, city officials and irrigation districts. Members of the Conservancy District also call at the office on many occasions. During the Legislature there are times when six to fourteen legislators a day call at the office. Federal congressional committees have spent time in the office and will continue to do so. These committees would be adverse to driving several miles in order to contact us relative to water problems. We would lose valuable contacts, especially in view of the \$500,000,000 Garrison Diversion Unit which the Commission has endeavored to obtain since its inception. An unfortunate situation exists which complicates our contact with the Corps of Engineers. The state has been divided on the basis of river basins. This requires us to deal with the Omaha District, the St. Paul District and the Riverdale District of the Corps of Engineers. The moving of our office would further complicate this situation. We are constantly in contact with these offices as they have project expenditures ranging upward to \$25,000,000 annually being conducted in the state. Our attorney is also required to consult the law library and this requirement would be rather unattainable in the event we were several miles distant. Inter-departmental approval of plans relating to water and sewage is required by state law. Approximately 379 plans have been interchanged during the past five years. The present location of these offices has permitted joint approval on a most efficient basis as our locations are on the 13th and 14th floors.

In discussing the matter, the Commissioners unanimously agreed that such a proposed move would be most inadvisable. The efficiency of the department in serving the public would be greatly reduced due to its inaccessibility. The Commissioners were desirous of being cooperative; however, in the best interests of the state and the many entities which they serve, such a move would only adversely affect the development of the state's water development program.

65

A letter from Congressman Krueger dated May 24th was read by Secretary Hoisveen. Congressman Krueger stated that the Swan-Buffalo Creek Watershed Project has been approved, per an attached resolution which he submitted. Secretary Hoisveen had previously written the Congressman indicating an interest in the project and urging its passage.

Secretary Hoisveen read a resolution from the Grand Forks County Board of Commissioners requesting the abandonment of the Fergus Dam. The dam has deteriorated to such a degree that it is a hazard to highway construction in that area. The dam was originally built by the Works Project Administration as a combination bridge and spillway. It was moved by Commissioner Christensen and seconded by Commissioner Math Dahl that the Commission approve the proposal by Grand Forks to abandon Fergus Dam. All members voted aye and said motion carried.

Secretary Hoisveen stated that arrangements are being made for the July 14th meeting to be held in Kansas City on that date. The purpose of the meeting is to discuss the Garrison Diversion Project with downstream proponents in an endeavor to correct any misunderstandings which now exist. Tentative arrangements call for approximately a 40 man delegation to attend said conference. The Commissioners that indicated a desire to attend said meeting were Governor Davis, Commissioners Tucker, Corwin, Math Dahl, Lunseth and Secretary Hoisveen. It was moved by Commissioner Tucker and seconded by Commissioner Math Dahl that said members be authorized to represent the State Water Conservation Commission at said conference. All members voted aye and said motion carried.

It was moved by Commissioner Einar Dahl and seconded by Commissioner Math Dahl that Secretary Hoisveen and Commissioner Tucker be authorized to prepare the budget for the State Water Conservation Commission for the 1960 biennium. All members voted aye and said motion carried.

Secretary Hoisveen stated that on December 19, 1957, Governor Davis wrote to the President of the Milwaukee Railroad relative to the easements necessary for the Marmarth flood protective project. This letter was most effective in obtaining action. However, the attorney for the project had stated that he was encountering considerable difficulty so far as the railroad easements were concerned and that this was holding up the completion of the project. To date the Milwaukee Railroad has not supplied the easements and it was recommended that Governor Davis write a follow-up letter again urging that these easements be obtained so that progress on the project can continue. Governor Davis stated that he would write such a letter.

The progress of the Garrison Diversion Unit Report was discussed. Secretary Hoisveen stated that Mr. Fredrickson had advised him that as far as the investigation monies are concerned, the House went along with the \$487,800. The concerted effort for increased appropriations will be made before the Senate Appropriations Committee. It is believed that we may be successful in obtaining an additional \$200,000 for investigational work in the Senate and House Conference Committees.

A letter from Mr. S. J. McElwain, President of the Garrison Civic Club, was read by Secretary Hoisveen. Mr. McElwain indicated a desire on behalf of the Civic

Club, interested farmers and landowners in having an irrigation district established in that area and requested a survey relative thereto. Commissioner Math Dahl moved that Secretary Hoisveen be directed to explore the situation and determine public sentiment in the area relative to an irrigation district. Commissioner Christensen seconded said motion. All members voted aye and said motion carried. The information obtained will be made available at a later Commission meeting.

Secretary Hoisveen stated that in a telephone conversation with General Seybold, he indicated his desire to hold an Engineering Committee meeting of the Little Missouri Compact. He stated that he would be in Bismarck the last week of June to formulate the necessary plans and arrangements. This committee is comprised of Messrs. Joe Grimes of South Dakota, Earl Lloyd of Wyoming, Fred Buck of Montana and Milo W. Hoisveen of North Dakota. The tentative date for such meeting is June 30th or July 1st.

Secretary Hoisveen stated that he had received a copy of the International Joint Commission report to the governments of the United States and Canada on the Souris River. It appears that a 50% division of the waters at the point of entry into North Dakota will be agreed upon. Fifty percent of the waters will be retained in Canada. North Dakota will be required to permit a flow of 20 cfs into Manitoba only when an adequate supply is available. Mr. Fredrickson has been following this matter in Washington, D. C.

The following water rights were considered:

Mr. Sidney T. Connell of Medora requests the right to divert 207.2 acre feet of water from the Little Missouri to irrigate 103.6 acres of land. It was moved by Commissioner Einar Dahl and seconded by Commissioner Christensen that Mr. Connell be authorized to permit the diversion of 60.0 acre feet of water to irrigate 40.0 acres of land. All members voted aye and said motion carried.

Mr. Lee Hoff of Leith requests the right to divert 244 acre feet of water from the Cannonball River to irrigate 122.2 acres of land. It was moved by Commissioner Christensen and seconded by Commissioner Einar Dahl that Mr. Hoff be permitted to divert 45.0 acre feet of water to irrigate 30.0 acres of land. All members voted aye and said motion carried.

Mr. William Corwin stated that he attended the Missouri Basin Inter-Agency Committee meeting held in Aberdeen on May 15th. There was only one question directed to North Dakota and that concerned the diversion of water from the Missouri River into the Red River of the North, which would convey water into Canada. It was contended that this water would be lost for future use by downstream interests.

A joint meeting of the Missouri Basin Inter-Agency Committee and the Columbia Basin Inter-Agency Committee will be held at Glacier Park on June 25th and 26th. It was moved by Commissioner Math Dahl and seconded by Commissioner Corwin that Governor Davis, Commissioner Tucker, Commissioner Einar Dahl and Secretary Hoisveen be authorized to attend said meeting. All members voted aye and said motion carried.

65

Secretary Hoisveen presented a Petition to Establish a State Park Commission to the Commissioners which had been left in the office by Representative Gus Fristad of Mandan. It was the general consensus of opinion among the Commissioners that the Commission should not participate in the circulation of petitions.

The meeting adjourned at 12:00 o'clock noon.

Respectfully submitted,

Milo W. Hoisveen  
Secretary

Attest:
