MINUTES

North Dakota State Water Commission Held in Fred J. Fredrickson Memorial Library Bismarck, North Dakota

March 28, 1973

The North Dakota State Water Commission held its meeting in the Fred J. Fredrickson Memorial Library, State Water Commission offices, Bismarck, North Dakota, on Wednesday, March 28, 1973. Governor-Chairman, Arthur A. Link, called the meeting to order at 10:00 a.m.

MEMBERS PRESENT:

Arthur A. Link, Governor-Chairman Richard Gallagher, Vice Chairman, Mandan James Jungroth, Member from Jamestown Alvin Kramer, Member from Minot Arne Dahl, Commissioner, Department of Agriculture Gordon Gray, Member from Valley City

OTHERS PRESENT:

Vernon Fahy, Assistant Chief Engineer, North Dakota State Water Commission, Bismarck

- Matt Emerson, Assistant Secretary, North Dakota State Water Commission, Bismarck
- Cliff Jochim, Special Assistant Attorney General, North Dakota State Water Commission, Bismarck

Delton Schulz, Office Engineer, North Dakota State Water Commission, Bismarck

Russell Dushinske, Executive Vice President, North Dakota Water Users Association, Minot

Dr. Dale Anderson, Director, Water Resources Research Institute, North Dakota State University, Fargo

CONSIDERATION OF MINUTES OF	It was moved by Commissioner Kramer,
FEBRUARY 21, 1973 MEETING -	seconded by Commissioner Dahl and
APPROVED	carried, that the reading of the
	minutes of the February 21, 1973
meeting be dispensed with and be approv	ved as circulated.

FINANCIAL STATEMENT FOR	Matt Emerson, Assistant Secretary for
MONTH OF FEBRUARY, 1973 -	the State Water Commission, presented
APPROVED	the financial statement for the month
	of February, 1973, commenting briefly
on the status of various Commission ac	counts

on the status of various Commission accounts.

After a short discussion, it was moved by Commissioner Gallagher, seconded by Commissioner Dahl and carried, that the Commission accept and approve the financial statement for the month of February, 1973, as presented.

MISSOURI SLOPE IRRIGATIONVernon Fahy, Assistant Chief Engineer for
the State Water Commission, extended an
invitation to the Commission members to
attend the noon luncheon of the Missouri
Slope Irrigation Development Association's
Annual Workshop being held this date.Vernon Fahy, Assistant Chief Engineer for
the State Water Commission, extended an
invitation to the Commission members to
attend the noon luncheon of the Missouri
Slope Irrigation Development Association's
the featured speaker for the luncheon, and the highlight of the workshop is a
film of the earth's surface taken by the Earth Resources Observation System
satellite.

WATER RESOURCES CONGRESS ANNUAL MEETING The Annual Meeting of the Water Resources Congress will be held April 3-6, 1973, at the Washington Hilton Hotel in Washington, tend this meeting by Commissioners

D.C. Reservations have been made to attend this meeting by Commissioners Gallagher and Jungroth, and Russell Dushinske, Executive Vice President of the North Dakota Water Users Association. Mr. Fahy indicated that he felt this Congress is a very worthwhile water resources organization and encouraged Commission members to attend future meetings whenever possible.

RUSH RIVER WATER MANAGEMENT DISTRICT'S REQUEST FOR APPROVAL OF PROPOSED SEWER SYSTEM IN BROOKTREE WELLS NEAR HARWOOD, NORTH DAKOTA (#716) Mr. Fahy read a letter from Daniel R. Twichell, West Fargo, regarding a proposal which has been received from the Rush River Water Management District to construct a sewer system in Brooktree Wells near Harwood, North Dakota. This proposed project would provide facilities to take

raw sewage from the area of Brooktree Wells to a sewage lagoon presently existing and owned by the Harwood Development Association. The project will provide for the orderly development of the area and eliminate pollution and environmental problems. It was the recommendation of Mr. Fahy that the Commission approve the project and plans as submitted by the Rush River Water Management District.

> It was moved by Commissioner Gray, seconded by Commissioner Jungroth and carried, that the State Water Commission approve the Brooktree Wells proposed sewer system project, and adopt Resolution No. 73-3-337, Rush River Water Management District, Proposal for Construction of Sewer System, Brooktree Wells Near Harwood, North Dakota. (See Appendix "A")

LANGDON DIVERSION DRAIN (#1565) Mr. Fahy briefed the Commission members regarding the serious problem in and adjacent to the city of Langdon. The

city has no well developed natural outlet channel for storm water runoff and approximately seven and one-half square miles of land drains through the city. Due to the recent ABM missile site construction, this has increased the need for adequate drainage and reduced the effectiveness of the existing limited drain routes. By agreement with the North Dakota Highway Department and with the sponsorship of the Cavalier County Water Management District, a plan has been designed for a permanent drain route. The State Water Commission has been requested to participate in cost sharing in the balance of the construction to carry the excess runoff to an adequate outlet. Total cost of the project is \$34,247. It was the recommendation of Mr. Fahy that the Commission participate in these costs in an amount not to exceed \$14,069.

It was moved by Commissioner Jungroth, seconded by Commissioner Gray and carried, that the State Water Commission participate in the Langdon Diversion Drain project in an amount not to exceed \$14,069.

CAVALIER-PEMBINA DRAIN NO. 51B (#1159) Mr. Fahy reported that on July 7, 1971, the Water Commission had approved for construction an extension to Pembina

County Drain No. 51B and cost participation was granted in an amount not to exceed \$7,043.55. A copy of the revised estimate of the proposed Drain No. 51B extension has been received which includes a greater cost of channel change and riprap at the upper end of the improvement than that originally estimated. The total cost of this addition amounts to \$487.30. It was Mr. Fahy's recommendation that the Commission participate in these added costs.

> It was moved by Commissioner Dahl, seconded by Commissioner Kramer and carried, that the Commission amend their previous agreement of July 7, 1971 to participate in the Pembina County Drain No. 51B, and include the \$487.30 addition in costs.

GRAND FORKS DRAIN NO. 4 (#1107)

Mr. Fahy stated that a request has been received from the Grand Forks County Drain Board for state cost participation

in the major extension and improvement proposed for Merrifield Drain No. 4. The total cost for this new concrete drop at the downstream end of the proposed drain, including section line crossings, is \$186,326.83. The request for state cost participation is estimated to be \$65,440. It was Mr. Fahy's recommendation that the Commission participate in the major extension and improvement proposed for Merrifield Drain No. 4 in an amount not to exceed \$65,440.

> It was moved by Commissioner Gray, seconded by Commissioner Jungroth and carried, that the Commission participate in the request from the Grand Forks County Drain Board for the major extension and improvement proposed for the Merrifield Drain No. 4, in an amount not to exceed \$65,440.

Because of the increasing costs of major drain facilities and the limited state funds available for all State Water Commission purposes, the Commission expressed an interest in reviewing our cost participation policies to assure equitable distribution of our limited funds. CITY OF WILTON, REQUEST FOR GROUND-WATER STUDY (#812) Mr. Fahy stated that a request has been received from the City of Wilton to conduct a ground-water study. Total estimated costs of the study would amount to \$6,000 and the costs would be shared

on a 50-50 percent basis by the City of Wilton and the State Water Commission. It was his recommendation that the Commission participate in the cost sharing of conducting a ground-water study for the City of Wilton in an amount not to exceed \$3,000.

It was moved by Commissioner Gray, seconded by Commissioner Kramer and carried, that the Commission participate with the City of Wilton in conducting a ground-water study for that city, in an amount not to exceed \$3,000.

MCKEE DAM (#442)

Mr. Fahy noted that at the February 21, 1973 meeting of the Commission, it was the consensus of the Commission members

to defer action on the request from the Barnes County Water Management District for guidance from the Water Commission regarding the recommended procedure in handling a local request to repair a former W.P.A. dam now serving about eight homeowners as a ground-water recharge for their domestic wells. The Commission staff has continued their investigation, but due to Commissioner Gray's absence from the state for the past month and not having a chance to familiarize himself more with the situation, it was again the consensus of the Commission members to defer action on this request until a future Commission meeting.

LAKE METIGOSHE STUDY (#330) Dr. Dale Anderson, Director of the Water Resources Research Institute, North Dakota State University, Fargo,

reviewed the objectives and accomplishments of the Water Resources Research Institute for the past year. He noted that it had been approximately one year since he met with the Commission, at which time he requested, and had been granted, monies by the State Water Commission to conduct an analytical evaluation of the utilization and management of water resources in the Lake Metigoshe Watershed, North Dakota, and an evaluation of North Dakota's first rural water system.

He briefly commented on the Community Water Conferences that had been held and reported that 15 critical North Dakota water problems had been derived from these conferences. It was the general feeling that these conferences had been very beneficial and it is hoped that more such conferences can be held in the near future.

He distributed reported on the Lake Metigoshe study and the first rural water system study to the Commission members, reviewing the objectives of the Lake Metigoshe study, accomplishments of the project thus far, and work planned for Fiscal Year 1974. Based on the magnitude of the problems encountered in this project, the accomplishments that have been made during the past year, and the proposed work identified for Fiscal Year 1974, the investigators of this project have requested a continuation of their project for 1974. Dr. Anderson, on behalf of the Water Resources Research Institute, presented a request to the Commission members for State Water Commission participation in the amount of \$10,000. The total amount for 1974 continuation of this project is \$27,250; assumed by the Water Resources Research Institute, \$14,500, the State Water Commission, \$10,000, and other sources \$2,750.

> After a discussion by Commission members, it was moved by Commissioner Jungroth, seconded by Commissioner Gray and carried, that the analytical evaluation of the utilization and management of water resources in the Lake Metigoshe Watershed, North Dakota, project definitely should be continued; that the Commission approve cost participation in the amount of \$10,000 to the Water Resources Research Institute for Fiscal Year 1974, as presented by Dr. Dale Anderson; and that the Water Commission should do everything possible to assist the Water Resources Research Institute in obtaining additional federal assistance for continuation of the study.

NORTH DAKOTA'S FIRST RURAL WATER SYSTEM (GRAND FORKS-TRAILL COUNTIES) (#1546) Dr. Dale Anderson reviewed the objectives of the evaluation of North Dakota's First Rural Water System and the accomplishments thus far on the project. The objective which will receive the most emphasis in

1974 will be to evaluate the rural water distribution system with respect to the delivery of adequate quantity and quality of water to its members. Monitoring of the socio-economic impact on the area will also continue during 1973-74 with emphasis on new housing construction, livestock enterprises, commercial activities and land sales. The continuation of this project for 1973-74 will result in an increase of funds from \$7,000 to \$13,250.

Dr. Anderson, on behalf of the Water Resources Research Institute, presented a request to the Commission for cost sharing in the amount of \$6,250 for continuance of the evaluation of North Dakota's First Rural Water System.

> After discussion, it was moved by Commissioner Jungroth, seconded by Commissioner Kramer and carried, that the Commission approve cost participation in the amount of \$6,250 for continuing the study of North Dakota's First Rural Water System in Grand Forks and Traill Counties.

WEST RIVER DIVERSION LIGNITE STUDY (#1543)

Delton Schulz, Office Engineer for the State Water Commission, distributed copies of a study entitled "Extensive Utilization of Lignite in the West

River Diversion Area" prepared by Dean Alan G. Fletcher, Director, Engineering Experiment Station, University of North Dakota. This study presents a preliminary overview of some of the possibilities for the utilization of lignite in the production of electrical energy, synthetic pipeline gas, and industrial chemicals. Mr. Schulz briefly reviewed some of the highlights of the report, making special emphasis on the six types of coal conversion processes.

Mr. Schulz noted that the State Water Commission had contributed \$12,500 of its West River funds for preparation of this report, and it is the Commission's wishes that this study continue in greater depths with restoration of funds for the West River study.

The Commission recessed at 11:40 a.m. to attend the Missouri Slope Irrigation Development Association workshop luncheon. The meeting was reconvened at 2:30 p.m. Commissioner Dahl was unable to attend the afternoon session of the meeting.

ROBERT SCHNELL, LEMMON, SOUTH DAKOTA - WATER PERMIT NO. 1910 Mr. Fahy stated that Mr. Robert Schnell of Lemmon, South Dakota, has filed an application for a water permit to use excess water, from spring runoff or

heavy rainfall, from the Cedar River for 260.0 acre-feet of water to irrigate 130.0 acres. Mr. Fahy also made reference to the moratorium which had been passed by the Commission on August 4, 1960, whereby the issuance of further water rights on the Cedar, Cannonball, Grand and Green Rivers and Apple Creek be curtailed until water conditions on these streams are improved through storage or importation of water from other sources. It was also noted that several landowners have reugested rights for use of waters on these sources and have either been denied the right or the amounts of water they requested had been reduced.

It was the feeling of the Commission members that if this moratorium was to be lifted on these excess waters, other interested landowners should also be considered; therefore, it was their consensus that the Commission staff determine the potential irrigators and the amount of excess water available before acting on any further applications for water rights.

> After a discussion, it was moved by Commissioner Jungroth, seconded by Commissioner Gray and carried, that the Commission staff be directed to determine potential irrigators of the excess flows available from the Cedar and Cannonball Rivers from spring runoff and heavy rainfalls, landowners now irrigating from these sources, and determine the amount of excess flows that

are available for use. Upon completion of this study, the Commission will then give further consideration to applicants for water rights in these particular areas.

It was moved by Commissioner Jungroth, seconded by Commissioner Gray and carried, that action be deferred on the water permit application by Mr. Robert Schnell of Lemmon, South Dakota, water permit No. 1910, pending further investigation on the Cedar and Cannonball Rivers.

MICHIGAN-WISCONSIN PIPELINE COMPANY'S REQUEST FOR WATER RIGHT

Mr. Fahy reported that since the public hearing held in Beulah, North Dakota, on February 21, 1973, regarding the application for a water permit to the Michigan-Wisconsin Pipeline Company to divert

375,000 acre-feet of water from Lake Sakakawea and the Missouri River, conflicting information has been received by the Commission. He indicated that it is his intent, if it is the wishes of the Commission members, to prepare a packet and forward to them, all information being held in State Water Commission files regarding this application to assist Commission members in making their final decision. He also noted that several other gasification companies have contacted the Commission regarding their interest in filing applications for appropriation of water in the same general area as Michigan-Wisconsin Pipeline Company.

It was the consensus of the Governor and the Commission members that they heartily endorse and support the development of the state's lignite resources, but in view of the number of anticipated applications for this water, the uncertainty regarding the actual amount of water the gasification process requires, the importance of this energy producing process to the entire nation, and for the best interests of the state, that this application be deferred pending further research on the subject. It is also their intent that June 1, 1973 be set as a tentative timetable in which to obtain this additional research and that a news release be prepared stating these intentions.

Mr. Fahy also noted that on May 9 and 10, 1973, the University of North Dakota is conducting a lignite coal symposium, which he urged as many as possible to attend.

WATER PERMITS

Vern Fahy presented 11 water permit applications, in addition to the

Michigan-Wisconsin Pipeline Company application and the Robert Schnell application, for consideration by the Commission members. It was his recommendation that water permit No. 1877, Forest River Community, be granted 1,920.0 acre-feet of water to irrigate 960.0 acres from the ground-water source only. The original request was to appropriate from both the Forest River and from ground water. It was also his recommendation that water permit No. 1898, City

March 28, 1973

of Wahpeton, and water permit No. 1900, City of West Fargo, be deferred action at this meeting pending further investigation of each.

It was moved by Commissioner Gallagher, seconded by Commissioner Kramer and carried, that the following water permit applications be granted approval subject to such conditions as indicated on the permit: No. 1895, Robert Myers, Binford; No. 1902, Raymond Kelsch, Linton; No. 1906, Lawrence Black, Karlsruhe; No. 1904, David Hafner, Beulah; No. 1903, City of Walcott; No. 1905, Gilbert Ost, Beulah; No. 1891, Robert Benson, Sheyenne; and No. 1882, William Hamann, Dickinson. Approval was also granted to No. 1877, Forest River Community, Fordville, for diversion of water from ground water only. Water permit No. 1898, City of Wahpeton; and No. 1900, City of West Fargo, were deferred pending further investigation. (See Appendix "B")

REQUEST TO RAISE HEIGHT OF WEIR ON HIGHWAYS 57 AND 20 SOUTH OF CITY OF DEVILS LAKE (#416) Mr. Fahy indicated that a request has been received from Neal Thompson, States Attorney of Ramsey County, for permission to allow the county to place sandbags around the upper edge of the Highway

No. 57 weir in order to impound additional water. Local officials are concerned because of the extremely limited amount of runoff and they feel that sandbagging the weir to increase the level by one foot would be beneficial to all interests.

It was noted that requests have also been received from local entities requesting State Water Commission consideration for a permanent raise in the weir elevation two feet; however, this will involve other agencies as well as a public hearing, so no action was taken on the requests.

> It was moved by Commissioner Jungroth, seconded by Commissioner Kramer and carried, that the State Water Commission grant permission to Ramsey County and/or the Devils Lake Park Board to place, temporarily, a row of sandbags not exceeding one foot in height around the top of the Highway No. 57 weir. The local entities as represented by States Attorney, Neal Thompson, who submitted the original request, shall be responsible for the immediate removal of the sandbags if problems or serious complaints occur.

REQUEST FROM BARNES COUNTY WATER MANAGEMENT DISTRICT FOR APPROVAL OF CREATION OF RURAL SEWER AND WATER SYSTEM FOR AN AREA WEST OF VALLEY CITY (#1360 and 1397) Mr. Fahy stated that a request has been received from the Barnes County Water Management District, indicating its plans for the creation of a rural water and sewer system for an area located directly west of the corporate limits of the city of Valley City, north of

Interstate #94, and south of the business loop of Interstate #94. He indicated that the plans are to install a pipeline which would be connected to the city of Valley City's water system and lagoon, but would be financed by the Barnes County Water Management District. The Barnes County Water Management District will not be meeting until tomorrow, therefore, they are requesting the Water Commission's pre-approval of the project, and they will be submitting this request in writing immediately following their meeting. Plans and specifications will then be submitted for approval of the project.

> It was moved by Commissioner Gray, seconded by Commissioner Kramer and carried, that the Commission pre-accept and pre-approve the anticipated project which will be submitted by the Barnes County Water Management District for the creation of a rural water and sewer system for the west side of Valley City; and that Resolution No. 73-3-338, Barnes County Water Management District's Proposal for Construction of Sewer and Water System, be approved. (See Appendix "C")

TOLLEY FLATS PROJECT (#626)

Mr. Fahy reported that a letter had been received from the Ward and Renville County Water Management Districts

indicating their desires to complete the Tolley Flats project. They are still exploring additional financial help in the added costs of the project, but feel it can be successfully consummated in the very near future. They are requesting the Water Commission to continue to hold and make available when needed the funds that have been earmarked for the project.

WHITE EARTH DAM (#327)

Mr. Fahy reported the status of the White Earth Dam and stated that the necessary repair work was being completed.

There being no further business to come before the Commission, it was moved by Commissioner Gallagher, seconded by Commissioner Kramer and carried, that the meeting be adjourned at 4:25 p.m.

RESOLUTION NO. 73-3-338

Barnes County Water Management District's Proposal for Construction of Sewer and Water System

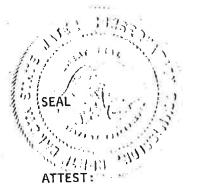

WHEREAS, the Barnes County Water Management District has presented a certain sewer and water project to the North Dakota State Water Commission, Bismarck, North Dakota, for its approval, which project provides facilities to take raw sewage from and water supplies to an area on the west side of Valley City, North Dakota, connecting with the City's water and sewer system presently existing and owned by the City of Valley City. This project will provide for the orderly development of the area and eliminate pollution and environmental problems; and

WHEREAS, approval of the State Department of Health has been received on said project proposal; and

WHEREAS, this Commission is of the opinion that said proposal is proper and feasible; and

WHEREAS, plans are to be submitted and approved prior to construction. NOW, THEREFORE, BE IT RESOLVED by the North Dakota State Water Commission at its regular meeting held on the 28th day of March, 1973, that said project be approved.
